

Timur Maksutov

Technical Project Manager

Summary

With over 15 years of expertise in the oil and gas, medical devices, and R&D, I am an experienced Project Manager, Tech leader, Engineer and Data Scientist with a proven track record of delivering impactful solutions at the intersection of technology and business.

Education

Master of Computer engineering (M.Sc.) with Honors | 2010

Gubkin Russian State University of Oil and Gas, Moscow

Faculty of Automation and Computer Engineering

Field of Study: Automated Electromechanical Complexes and Systems

Skills

Project Management

- R&D, Agile, SAFe, QMS
- Risk Management
- Process Engineering
- Requirements, Traceability
- Polarion, Helix ALM, Azure DevOps

ML and Data Science

- Anomaly Detection, Digital Twins
- Data Analysis, Python, VBA
- Power BI, Tableau, Cognos
- Classical ML, Deep Learning
- SQL databases, Data Pipelines
- Keras, Scikit, Pandas, Polars, Dask
- Microsoft Azure, CI/CD, MLflow

Software Development

- Testing, Test Automation, ISTQB
- V-Model, Quality Assurance, SRS
- Connectivity, IoT, Digitalisation
- SCADA, PLC, ArcGis
- Physical modelling, simulations

Languages

- English: C1
- German: B1
- Russian: Native

Personal projects:

Experience

Jul 2022 - Present

Belimed AG | Zug, Switzerland

AI /ML lead

Managed AI strategy and product innovation, integrating data-driven approaches into strategic decision-making and increasing business value.

Designed data platform and ML models (deep learning, distributed computing) for predictive analytics, digital twins and anomaly detection, defining data architecture, enabling detection of up to 50% of issues and predicting up to 20%.

R&D Project manager

Led R&D project for medical device auxiliary equipment, overseeing software design, QA, regulatory compliance, and technical documentation to ensure standards adherence.

Requirements & Test Engineer

Defined requirements, test plans, and implemented System Engineering principles, integrating R&D QA strategies for embedded software and electrical systems in medical devices, within V-model principles.

Administered Polarion, Helix ALM, and Azure DevOps to achieve 100% traceability and requirements test coverage, ensuring product quality and compliance with IEC 62304 and ISO 13485.

Managed and deployed automated and regression testing protocols for software and systems to ensure continuous quality assurance, resulting in an 80% reduction in error rates

Created advanced mathematical models and simulations for process engineering to optimize equipment performance. Supported development of IoT and connectivity product.

Jan 2020 - Jun 2022

Nord Stream 2 AG | Zug, Switzerland

Gas Pipeline Transportation Engineer

Led commissioning for pipeline start-up, packing, and ready-to-launch preparations, ensuring seamless transition to operations.

Integrated tools (SCADA, hydraulic simulation, digital contracting, dispatch journals, ArcGIS-based ship monitoring) as Product Owner/Developer.

Optimized pipeline operations by developing/executing gas volume nominations using advanced hydraulic calculation systems (PAS) and improving operating modes.

Analyzed complex datasets using SQL, Excel VBA, CSV, Power BI, and SharePoint to deliver actionable insights and drive data-driven decisions.

Oversaw maintenance and troubleshooting for mechanical, electrical, automation, and metrology systems, ensuring optimal system reliability.

Conducted risk management frameworks, including identification, planning, tracking, and responsive action strategies, mitigating operational risks.

Apr 2013 – Dec 2019

Gazprom | Moscow, Russia

Chief Technologist

Oversaw and real time optimization of Gas Grid System operation modes, gas flow schemes

Enhanced Automated Dispatch Control Systems to improve performance and monitoring

Conducted data analyses to identify optimization opportunities and strategic decision-making

Reviewed maintenance requests of maintenance operations and consolidating schedules

Chief Specialist

Development of operational flow schemes and facilities modes, oversight over maintenance

Engineering and data communication software development and integration

ISO 9001 Internal auditor

Sep 2010 – Feb 2013

Laboratory of NPF Inkram | Moscow, Russia

Automation System Engineer

Equipment diagnostics, algorithms development, software engineering and maintenance of PLC gas detection and control systems

Certifications

- PRINCE2® Project Management Foundation
- Google Project Management Specialization
- ISTQB® Software Testing Foundation
- Microsoft Certified Azure AI Fundamentals
- ISO 31000:2018 Enterprise Risk Management
- ISO 9001:2015 Quality Management System (QMS)
- IBM Data Analyst Specialization
- ISO 13485:2016 Quality Management Systems for Medical Devices
- Six Sigma Yellow Belt
